

1. Cut out the phone template included with the pack. Cut along the solid black line. Do not cut the dashed lines. Remember to recycle any left over paper!

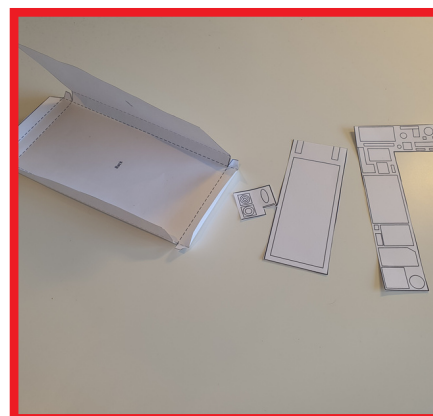

2. Cut out the components of the phone along the thick black line.

You might want to label the back so you don't forget which is which.

3. Decorate your mobile phone.

4. Make a fold along each of the dotted lines, folding inwards (towards the labels).

Make sure your design is on the outside.

5. Assemble the phone. Doing this one corner at a time, put glue on the outside of each folded tab and stick it to the side of the phone it lines up with. repeat for all 4 corners. Do not stick down the screen.

6. Finally, place the components inside the phone.
